

China Fixed Income: Understand and invest in a new asset class

As investors continue to be challenged to find new ideas in fixed income, the answer may come from China, which has opened its bond market to foreign investors. The inclusion of Onshore Chinese Bonds as part of leading indices have motivated institutional investors to engage in Chinese fixed income. China is the 2nd largest economy and the 3rd largest bond market worldwide, it is becoming too big to ignore, not only for institutional investors. The need will be for active fund management to help investors to secure market return, whilst proficiently mitigating the risks. Our speaker is ideally positioned to comment on this opportunity as the manager of this fund.

The Eurizon Fund Bond Aggregate RMB is the largest fund in its peer group through use of local language and robust investment approach.

Pierpaolo Rinaldo

Pierpaolo worked as a Global Macro Portfolio Manager in UK investing across asset classes with a focus on DM Fixed Income. Previously, he spent several years at Banca IMI in Italy.

He held the position of Head of Diversified Investment and AFS Management, where he was in charge of the proprietary desk and the management of the banking book.

Pierpaolo graduated cum laude in Economics at Bocconi University, Milan, and holds a Masters in Statistics from Carnegie Mellon University, USA.
