

UBS

Paris Aligned and Low Carbon ETFs – What is their Sustainable Performance & Impact?

As climate change is undeniable one of the largest challenges our planet faces, UBS Asset Management (UBS AM) assists its investing clients to meet their sustainability objectives and supports investors to mobilize capital toward a low-carbon economy. For investors seeking to address climate change risks and opportunities, UBS AM has therefore launched a suite of Paris-Aligned ETFs.

In the workshop we would like to demonstrate the sustainable performance and impact of these MSCI Climate Paris Aligned indexed solutions:

1. Carbon footprint reduction
2. Transition and physical climate risks
3. Green vs brown revenues
4. Sustainable Finance Disclosure Regulation (SFDR) Art 9(3)
5. Financial performance

Raimund Müller

Executive Director, Leiter UBS Passive & ETF Specialist Sales Schweiz & Liechtenstein. Raimund Müller verfügt über eine 16-jährige Erfahrung in der Finanzindustrie mit besonderer Expertise in der Betreuung institutioneller Anleger. Seit 2012 ist er für die UBS AG im Asset Management in Zürich tätig. Vor dem Wechsel zur UBS AG arbeitete er in der Betreuung institutioneller Anleger im Asset Management der Deutschen Bank und bei Lombard Odier.
